JSP, s.r.o. Industrial Controls

We are a top Czech supplier and manufacturer in the area of measurement and control technologies

We prepare complete projects for I&C Systems, provide a wide range of engineering services, delivery and servicing of individual instruments, complete measuring circuits as well as deliveries of a complete I&C equipment. We are also an integrator of supplies for investment units.

Our highest priority is quality, reliability and development. The integrated management system combines quality management, environmental management and occupational health and safety management. Our management system is certified according to EN ISO 9001, EN ISO 14001 and BS OHSAS 18001 and is thoroughly implemented in all the main processes.

The main range of our deliveries includes instruments for measurement and control of temperature, pressure, level, flow rate, heat and analysis. We produce temperature sensors, pressure sensors, flow sensors, programmable two-wire transmitters, power supplies, isolators, HART communicators and accessories for temperature, pressure, flow and level sensors as well as valve units and communication software.

JSP Highlights

- **Successful activity on the market** since 1993
- **Team of experts and specialists** in measuring temperature, pressure, chemical analysis, and other quantities
- **Utilisation of the best experience** from realised projects in our country and abroad (Austria, China, Egypt, Russia, ...)
- **Capital security and project funding** with flexibility and adaptability to customer's requirements
- **Own manufacture** supporting completion of large projects

JSP Comprehensive solutions

Engineering

- Studies • Tender Design • Basic Design • Detail design
- As-Built Design • Construction management
- Consultancy

Manufacturing and completing

- Own manufacturing capacities • Certified integrated quality system • Functional system of quality and proven suppliers • Advanced delivery logistics

Work realisation

- Complex provision of I&C projects • Construction planning and management • Provision of installation/general construction • Test performance and commissioning

Services

- Environmental responsibility (EN ISO 14001) • Own accredited calibration laboratory • Warranty and post-warranty services • Specified I&C concept

Comprehensive projects and deliveries of I&C technologies

for:

Production

- Sensors for measurement of temperature, pressure and flow including accessories.
- Programmable transmitters and power supplies.
- Complete systems of sample conditioning and analysis for energetics.

Trade and Logistics

- Comprehensive range of instruments for measurement and control from more than 300 of the most important manufacturers.
- We cover all the main nonelectric physical variables in industry: temperature, pressure, flow, level, analysis and others.
- Completion of suppliers and packing for land, air or marine transport all over the world.

Projects

- Complete project works of I&C systems, cabling, weighing and lighting.
- Investment studies, preliminary documentation, preliminary projects, implementation projects.
- Assembly projects, As built documentation, assembly supervision, consultant services and other services.

Investment deliveries

- Complete I&C "turn-key" deliveries including cabling and lighting.
- Management and implementation of projects, deliveries, commissioning, assembly and service work.
- High quality and economically attractive outsourcing of I&C services for the suppliers of complex technological units.

Many years of experience from accomplished supplies all around the world

- **Pruněřov II 3x 250 MW** / Czech Republic / Siemens, ČEZ
- **Počerady 880 MW** / Czech Republic / IC Energo, ČEZ
- **NZ Ledvice 660 MW** / Czech Republic / Emerson Process Management, ČEZ
- **New Talkha 750 MW + El Kureimat II. 750 MW** / Egypt / Škoda Praha Invest
- **GDK Mellach 850 MW Gas CCGT** / Austria / Siemens AG Austria
- **Permskaya TEC-6 124 MW + Vologodskaya TEC 110 MW** / Russia / AE&E CZ
- and many others...

JSP Industrial Controls

“

We prepare complete projects for I&C Systems, provide a wide range of engineering services, delivery and servicing of individual instruments, complete measuring circuits as well as deliveries of a complete I&C equipment. Our main goal is quality, reliability and completeness.
